Will Latta is the Founder and Chairman of LP Amina, a multinational environmental engineering and clean coal development company with deep expertise and broad R&D activities in the US and China. LP Amina has over 100 full-time employees and a network of over 2,000 technicians in diverse locations across the globe.

Mr. Latta has over 20 years of experience in the power generation industry. Prior to founding LP Amina in 2007, Mr. Latta was with Alstom Power, a global leader in conventional power generation equipment manufacturing. His responsibilities at Alstom spanned from engineering, to project management, to regional P&L management. Mr. Latta holds a bachelor’s degree in mechanical engineering from the Georgia Institute of Technology and a MBA from Duke University.

Mr. Latta represents LP Amina on the Advanced Coal Technology group of the U.S.-China Clean Energy Research Collaboration (CERC), a bilaterally funded organization that facilitates U.S.-China cooperation to advance clean energy technologies. Furthermore, Mr. Latta is the co-chair of the U.S.-China Energy Cooperation Program, a group that promotes commercially viable projects in clean energy, and supports the sustainable development of the energy sectors in both countries.
