

# health analytics: where data elevates decision making

Designed for busy health professionals and leaders, the online Master of Science in Quantitative Management: Health Analytics program provides the business fundamentals, industry context, and advanced data analytics needed for better decision-making within health organizations.

By successfully completing this program, you will gain both the advanced business analytics skills as well as the experience and knowledge to apply those skills effectively and ethically within health environments.

The curriculum comprehensively covers coursework in quantitative analysis, business fundamentals such as accounting and finance, health policy, the legal implications of health analytics and more. Few, if any, other programs provide both the quality and depth that Duke's health analytics curriculum offers.

## About the Fuqua School of Business

Duke University's Fuqua School of Business attracts and nurtures a new kind of leader who has the power to bring out the strength in others and move teams forward toward a common purpose. Our community is made up of students and faculty from around the world who thrive in an environment with differing viewpoints. We bring them together to inform a leadership style that inspires entire organizations to do better while doing what's best.

The school has long-standing relationships with firms in key industries, including healthcare, financial services, consulting, technology, consumer goods, energy and the environment, and media, as well as a focus in the areas of entrepreneurship and social impact.

Our network of 22,000+ alumni, many of whom remain highly engaged with Fuqua, are known for a special way of working. Ultimately, we measure the success of our graduates by their impact on workplaces and the world around them, by their relationships and reputations.
