EMPLOYMENT REPORT

2020
Every year about this time, I enjoy sharing our annual employment report, because it generates interesting discussions about where and how our graduates are making an impact. As the world changed around us this year, the annual recruiting success of Duke MBAs continued with the Class of 2020. Despite hiring freezes and massive layoffs, our students had an unrelenting focus and commitment that led them to landing in their desired roles, companies, and locations.

Many of our graduates made significant career transitions, whether by function, industry, geography – or sometimes all three – despite difficult market conditions. From grant writer to tech product manager. From economic development in another country to the music industry in the U.S. From professional lacrosse to private equity. From special events at the White House to impact consulting at a certified B corp. From lawyer to McKinsey consultant. From a mid-Atlantic university to a California consumer foods company. From piloting Apache helicopters for the U.S. Army to strategizing M&A transaction execution for EY – Parthenon. It’s successes like these, especially in a year as turbulent as 2020, that bring the numbers in our employment report to life.

Sheryle Dirks
Associate Dean for Career Management

Hello

Here are some interesting findings from our 2019 – 2020 report

1. Our graduates enjoyed strong employment rates despite difficult conditions.

The percentage of students receiving full-time offers by graduation is up six percentage points over last year, at 90%. Because recruiting slowed dramatically in the spring and summer, the rate of 93.5% receiving offers by three months post-graduation is down three percentage points from 2019. These outcomes are remarkable in the context of the high number of global hiring freezes and layoffs prompted by the pandemic.

2. Compensation was up slightly over last year.

Average first-year compensation reached an all-time high at $171,000. This figure represents a 3% increase over 2019, with a slight rise in mean salary to $136,000 and a 7.5% jump in signing bonus to $35,000.

3. Despite visa uncertainty, international students landed U.S. jobs.

Navigating employer visa sponsorship and cultural differences always adds complexity for international students seeking U.S. jobs post-graduation. From 2015 – 2019, the percentage of international graduates accepting jobs in the United States ranged from 89% - 92%. This year brought many new complications—visa delays caused by pandemic shutdowns, job market disruption, and both rumored and actual changes to U.S. immigration policy. Yet, for the Class of 2020, that number was even higher at 94%. Success in the face of these challenges is even more impressive.

More than ever, the world needs the types of graduates we produce at Fuqua – leaders who know how to embrace differences to work toward a common goal. I look forward to learning how you will impact your company, community, and even the world as a future graduate of Duke’s Fuqua School of Business.
we believe

Our goal is that every one of our students drive their unique career search successfully. We achieve this by being relevant with both students and employers, by teaching students a repeatable job search process they can own, and by carefully targeting new employer relationships based on the great work they are doing today and are anticipated to continue into the future.

about the report

• Our data is in compliance with the standards of the MBACSEA (MBA Career Services & Employer Alliance) for data gathering and reporting.

• “Permanent Work Authorization” is defined as the student being a citizen or permanent resident of the country where they are attending school.

work

We don’t just help you with your first job—it’s about your career

At Fuqua’s Career Management Center (CMC), our responsibility is to equip and empower students to earn job offers from employers where they will be able to accomplish amazing things. The career search process we advocate starts in business school, but will continue throughout our students’ careers as they grow as leaders, as industries change, and as their own preferences and priorities change over time. For this reason we teach the skills and share the tools needed to conduct a successful job search now, and for the rest of their careers.

THE DUKE CMC ADVANTAGE

“Fuqua’s CMC is invested in your progress from the very first moment you start any program at Fuqua. In the MBA program we were set forth on the right path to help us achieve the maximum benefit from our program. We were asked to give peer feedback on resumes and STAR responses that really proved eye-opening to us new students. When all is said and done, the counselors in the CMC are top notch and are vested in your success.”

- Class of 2013 graduate

THE DUKE MBA ADVANTAGE

What makes Fuqua students different?

“They are supportive team players who will go the extra mile to help people on their team, they don’t put on airs, they are not aggressively competitive, they respect diversity, they’re able to work with a wide variety of clients and can draw insights from people at all different levels. They fit well within our culture.”

- From qualitative research among Duke MBA employers

We recognize that our diverse student population has a diverse set of goals when it comes to post-graduation employment.

Gone are the days where a career center would exclusively focus on teaching job search tactics for specific industries or employers that have targeted MBA students historically. Instead, the Fuqua CMC assists students with strategies and tactics to use for career search success regardless of their industry of choice or the historical MBA hiring patterns within that industry. We teach our students how to identify opportunities outside the traditional roles as their needs have become more non-traditional. This focus on a customized job search has the benefit of empowering students in their own personalized career search as well as developing relationships with emerging employer industry leaders.
These are the 48 employers hiring multiple Duke MBA graduates for full-time positions in 2020.

**Activity sources that led to job acceptance**
industries employing our mbas

WHERE ARE THEY WORKING?

Duke MBA graduates accepted new positions in over 20 different industries, reflecting the breadth of interest in our students among a wide range of employers.
The breadth of career interests among our students and across employers is complemented by depth in four key industries employing roughly 85% of students reporting their new positions: Consulting, Technology, Financial Services, and Health Care. An additional 5% of students are employed in Consumer Packaged Goods.
Within the Consulting industry, almost one-half of our graduates entering consulting accepted positions in general consulting; approximately 40% more entered the strategic or management consulting field. The remainder are consulting in a broad range of additional fields, including technology, human capital, biotech, health care, and other niche areas.

**within the consulting industry**

- General: 45%
- Strategic/management: 39%
- Other consulting: 6%
- Technology: 4%
- Human capital/people analytics: 3%
- Health care: 2%
- Biotechnology: 2%

Three Technology sub-categories attract the majority of our 2020 graduates: Internet services/Ecommerce accounts for roughly 40% of technology positions, general technology employment accounts for slightly more than one-quarter, and software for about 17%. The remaining accepted jobs are in equipment/hardware/networking, multimedia products and services, and other technology areas.

**within the technology industry**

- Internet services/e-commerce: 40%
- General: 28%
- Software: 17%
- Equipment/hardware/networking: 10%
- Other: 6%
- Multimedia products & services: 1%

Roughly half of 2020 graduates entering the Financial Services industry are working in investment banking and brokerage firms. Private Equity and Private Equity/venture Capital together account for the next largest group of positions at 13%. Insurance and general finance areas employ slightly more students than commercial banking, diversified financial services, and other finance fields.

**within the financial services industry**

- Investment banking: 48%
- General: 10%
- Insurance: 10%
- Commercial banking: 7%
- Private equity: 7%
- Venture capital: 7%
- Diversified financial services: 5%
- Other: 5%

Biotechnology/Pharmaceuticals account for almost half of 2020 Health care positions accepted by our recent graduates. Providers/Payers and Medical Device manufacturer drew an additional one-third of health care job acceptances.

**within the health care industry**

- Biotechnology/pharma: 46%
- Providers/payers: 19%
- Medical devices: 15%
- General: 12%
- Health care IT/informatics: 4%
- Other: 4%
The percentage of Duke MBA graduates accepting positions in the Technology industry has grown over the past five years while Financial Services and Consulting have held fairly constant. Health Care has decreased slightly over the same period.
Employment opportunities took 2020 graduates all over the United States. Over 80% of domestic positions were located in a broad range of major US cities. In addition, 24 graduates are planning to work outside of the US in countries like S. Korea, Japan, China, Mexico, Chile, and Brazil.
employment by function

WHAT ARE THEY DOING?

Our MBA graduates accepted positions in roughly 32 different functions across industries. Job scope, however, varies widely based on the industry in which they work.

23% of the 151 unique employers are headquartered internationally.
Consulting remains the role accepted by the largest number of Duke MBAs in 2020, with several graduates taking on consulting roles in non-consulting organizations. One-third of graduates are consulting in their new positions. Slightly less than 22% of graduates have taken finance positions. About 18% have accepted general management roles, and 17% are working in marketing functions.
General and management consulting together account for about 85% of the consulting roles our 2020 graduates are conducting. Internal, operations, and other consulting functions account for most of the remaining consulting positions.

Investment banking is the most common of the finance roles and was accepted by almost 45% of Duke finance-focused MBAs. Another one-third of these graduates will be working in corporate finance, and almost a tenth starting a private equity role.

Most 2020 graduates taking on a general management position are focused broadly within their role. Over one-third of these graduates were accepted into a leadership development program, with another 30% conducting a wide range of general, internal consulting, or corporate management duties. One-quarter of graduates in general management are focused on developing new opportunities for their organizations, managing product strategy, or managing projects.

Product management and brand management, which are used interchangeably in some industries, are functions attracting about the same number of Fuqua graduates. This role accounts for 82% of the marketing and sales functional roles. These management positions are distantly followed by sales and general marketing roles.
employment trends for top functions

Percent of Fuqua MBA graduates filling function

The percentage of consulting roles accepted by Duke MBAs has held fairly steady over the past 5 years, consistent with the percentage of industry positions taken by our grads. Similarly, after growth in 2017, general management functional positions have leveled out subsequently. Finance opportunities seem to trend in an opposite manner to Marketing/Sales options.

THE DUKE MBA ADVANTAGE

“Fuqua graduates have a commitment to making changes that challenge the system. They do the right thing, and they have the organizational courage to do the tough thing.”

- From qualitative research among Duke MBA employers
WHAT ARE THEY EARNING?

The following tables show full-time compensation information for Class of 2020 graduates. This data is based on acceptances by three months post-graduation, in U.S. dollar equivalents, and self-reported by students. To protect privacy, salaries are not reported when there are less than four usable data points, the number is less than one percent of the reporting population, or when all salaries in the category are equal.

What are they earning?

WHO’S HIRING?

Both the caliber of employers recruiting our MBA graduates, and the number of graduates they hire each year, are a testament to the relationships built and maintained by Fuqua’s CMC and to the value that our graduates bring to these employers.

In 2020, more of our graduates were hired into organizations with 100,001 - 500,000 employees than any other size firm.

---

**THE DUKE MBA ADVANTAGE**

“Fuqua blows other schools away at teamwork. They value teams, and they talk about it. And it’s reflected in their behavior.”

- From qualitative research among Duke MBA employers

---

“When I started my company, I tapped into the Fuqua network constantly for advice. What was most rewarding was people’s willingness to go out of their way to help a fellow Fuquan however they could.”

- Class of 1995 graduate
health care 
industry 
resources

WHAT DOES FUQUA OFFER?

Duke University has educated professionals in the administration of hospitals, health systems, and health-related organizations since Duke Hospital opened in 1930 – meaning Health Sector Management (HSM) at Fuqua is the oldest and largest health management program among top U.S. business schools.

+25%

increase in enrollment in our Health Sector Management Certificate program in 2019-2020 versus the previous year.
DYNAMIC COURSES

Among the many dynamic courses available to HSM students are Health Institutions, Systems and Policy; Health Care Markets; Provider Strategy; and Health Policy and Management. More than 20 percent of students choose to earn the Health Sector Management certificate – whether they are intent on pursuing a career in the health sector itself, or in developing an understanding of an industry that accounts for nearly a fifth of U.S. GDP.

unique connections

While Fuqua is known for preparing students across a broad range of industries, the health sector is one of our specialties.

Here we focus on the entire industry ecosystem: provider, payer, policy, biotech, pharma, IT, med device, global health, and more. Our Health Sector Management certificate helps students understand market fundamentals and gain exposure to the complex interactions among industry players.

health care

CasTag Biosciences is a start-up based on technology developed at Duke University that allows researchers to study any gene of interest at an unprecedented rate. Our scientists developed a new vector system for CRISPR Knock-In to allow researchers to study endogenous proteins to expedite medical discovery.

Fuqua activities:
- Co-president of the Entrepreneurship and Venture Capital Club
- Venture Fellow
- Senior Venture Fellow
- Program manager for the New Venture Fellows

Summer internship:
Hatteras Venture Partners

Students’ faculty, advisors, and the real-world projects they participate in help make connections to industry leaders—including those in nearby Research Triangle Park.

Fortune 100 multinational organizations, university spin-outs, and start-ups are all right in our backyard. Cross-collaborative opportunities with organizations like Duke University Hospital or the Duke-Margolis Center for Health Policy aren’t just accessible to our students – they’re a meaningful part of their education.

FUQUA EMPLOYMENT REPORT 2020

HEALTH CARE INDUSTRY RESOURCES

fuqua.duke.edu/programs/daytime-mba/career-development
Internships are an important part of the career search process. Internships provide opportunities for first year MBA students to practice the skills they’ve learned through the CMC offerings, to test the industry or function they aspire to enter, and possibly to secure a job offer prior to starting their second year.

“...incredibly helpful in preparing us for the recruiting season and getting into a good summer internship. I’m sure I wouldn’t have gotten the Summer Associate position at JPMorgan without the CMC’s help.”

- Class of 2007 graduate
